

GWD 255 Drum Vacuum

A Drum Top Vacuum

GWD 255

Designed to meet the general plant cleaning and maintenance needs of industrial manufacturers, the Nilfisk GWD 255 Drum Vac is powered by 2 independent bypass motors and can fit both 30 and 55 gallon drums, allowing users to recycle drums that are abundant in nearly every production plant.

- Washable main sack filter extends filter life
- Fifty-foot yellow safety cord for ultimate safety
- An optional float chamber and washable cartridge filter allows the GWD 255 to pick up both wet and dry materials
- Upstream HEPA filter available for pick-up of hazardous materials, ensuring 99.97% of particles are retained, down to 0.3 microns
- 38 mm or 50 mm accessory kits are available to meet a wide range of cleaning needs

Technical Features	GWD 255	
Voltage @ 60 Hz.	volts	110-120
Type of power	no. of phases	single
Amperage	amps	12
By-pass motor	quantity	2
Power	watts	1800
Waterlift, max.	inches H2O	80
Airflow, max.	cfm	220
Machine inlet	mm	50
Cord length	feet	50
Optional filter efficiency, HEPA	DOP-tested	99.97% @ 0.3 microns
